

HIGH-SPEED INTERNET

What speed do I need?

Devices are defined as internet-connected equipment.

Some examples include: Smart TVs, phones, tablets, notebook and desktop computers, home automation devices (security systems, thermostats, and cameras), video streaming devices (Roku, Apple TV, Amazon Firestick, etc), and gaming systems (PlayStation, XBOX, etc).

Speeds are not guaranteed. Examples listed can vary based on actual usage.
Chart is based on basic usage information, results may vary.
